

Genius Within CIC are looking to extend our network of Associate Psychologists to deliver diagnostic assessments to adults across the UK.

At Genius Within we take a strengths-based approach to assessing clients for neurodiversity, highlighting their talents, and making suggestions for workplace and learning solutions. Our Associate Psychologists take a person-centred approach to diagnostics. They are first and foremost positive and enabling, seeking to empower clients to understand their neurodifference in a meaningful way. They also have great analytical skills and exercise attention to detail in using and interpreting diagnostic tests and producing individual reports.

We would need you to be able to produce positive, rigorous, and client-centred assessment reports to tight service level agreement deadlines. In return, we offer a competitive assessment fee, access to our lively peer supervision network and CPD events that are free or at a greatly reduced cost.

## Essential

- HCPC-registered practitioner psychologist in any area of specialism
- Trained and experienced in conducting diagnostic assessments in work and education, across a range of neurodivergent profiles.
- Knowledge of adjustments and support for neurodiverse adults in education, training and the workplace.
- Up-to-date knowledge of relevant guidance on assessment and reporting, such as from SASC and the BPS.
- Safe and suitable accommodation for face-to-face assessments, if offered
- Registered with HMRC as self-employed or as a limited company
- Professional indemnity insurance.
- Enhanced DBS clearance.

## Desirable

- Experience of using remote assessment platforms, such as Q Global
